## EXPERIENCE

### ClearBrain *Software Engineer Intern*

Summer 2017 | San Francisco, CA

Designed and executed a production-ready marketing site while optimizing for SEO using React. Redesigned and implemented a decision tree visualization for the app using Google Visualization. Merged internal data and firebase data to generate CSV exports.

### Horizons School of Technology *Fellow*

Summer 2017 | San Francisco, CA

Accepted amongst 2500+ candidates for their full-stack web development fellowship. Learned JavaScript/Node.js, Express, React/Redux, MongoDB, HTML/CSS.

### MIT Mobile Experience Lab *UI/UX Designer*

Fall 2016 - Spring 2017 | Cambridge, MA

Fall 2016: worked with BNP Paribas Cardif to transform a universally painful insurance experience to a streamlined process, focusing on UI/UX and bot interactions. Redesigned and created a working live demo of the mobile app.

Spring 2017: created essential infographic elements to depict future applications of how ENI's technological innovations will revolutionize worker health and welfare

### Wellesley Hackathon *Web Developer*

Spring 2017 - Fall 2017 | Cambridge, MA

Organize the MLH at Wellesley with a team of 13 that will take place in November, 2017; Develop the Fall 2017 WHACK website and an accompanying Day Of page

## SKILLS

JavaScript/  
Node.js, JQuery  
HTML/CSS  
Express,  
MongoDB  
React/Redux,  
React Native,  
Python

## PROJECTS

### Munchr *Frontend Developer*

Developed a mobile app to predict user meal preferences based on swiping of food images using React Native

### React Chat

Developed a chat application using React and WebSockets. Implemented functionality to enter a room, send messages, receive messages, and change rooms.
